BRUSHES WITH TWISTED KNOTS	
Filament Material	Phosphated Steel - Stainless Steel - Brassed Steel - Brass
Ø Filament	0,15 - 0,20 - 0,25 - 0,30 - 0,35 - 0,40 - 0,50 -0,60 - 0,80 -1,00 - 1,20 -1,50
Brush Type	Circular - Roller - Strip - Linear - Frontal - Single Knot

The brushes with twisted knots are applied in very hard works, like in deburring and in material removal.

Different kind of brushes can be made with twisted knots like roller, frontal, linear and strip brushes.

For special uses we can produce brushes with non-sparking wires.

On request we can manufacture custom-made brushes with your own dimensions and special materials.

ROLLER AND SPIRAL BRUSHES	
Filament Material	Phosphated Steel - Stainless Steel - Brassed Steel - Silicon Carbide Abrasive - Ceramic Abrasive - Aluminum Oxide Abrasive - Diamond Abrasive - Tampico Fiber - Carbon Filaments - Mixed Filaments
Type of Rollers	Punched Roller Brush - Strip Roller Brush
Type of Spirals	External - Internal

On request we can supply brushes designed on your own technical drawings and support axles.

We are in a position to supply brushes for every kind of machines thanks to our years-long experience.

We can guarantee long life for our brushes, owing to the high density of the filaments and the high quality of the raw materials.

FRONTAL BRUSHES	
Filament Material	Phosphated Steel - Stainless Steel - Brassed Steel - Silicon Carbide Abrasive - Ceramic Abrasive - Aluminum Oxide Abrasive - Diamond Abrasive - Tampico Fiber - Carbon Filaments - Mixed Filaments - Abrasive Cloth - Non Woven
Connection	Shaft - M14 - Other connections on request

This kind of brushes are utilized for deburring, cleaning, edge rounding and metal polishing.

Thanks to our years-long experience we are in a position to supply brushes for every kind of machines like Costa, SCM, Lissmac and etc.

We can guarantee the long life of our brushes owing to the high density of the filaments and the high quality of the raw materials.

We can also manufacture conductive brushes with carbon filaments for electrolytic picking with connections on request.

LINEAR BRUSHES FOR METAL SHEETS SUPPORT	
Filaments Material	Nylon with different Ø and colours
Dimensions	Custom made dimensions, punching pattern and connection systems

This kind of brushes supports the metal sheets and are especially used in machineries for metal sheets punching.

We are in a position to supply brushes for every kind of machine thanks to our years long experience.

Owing to the high density of filaments and the high quality of the raw materials, we can guarantee a long life for our brushes.

FRONTAL BRUSHES FOR ALLOY WHEELS DEBURRING AND POLISHING	
Material Filament	Silicon Carbide Abrasive - Ceramic Abrasive - Aluminum Oxide Abrasive - Diamond Abrasive - Mixed Filaments
Connections	Custom Connections

These brushes are utilized for deburring, edges rounding and alloy wheels polishing.

Thanks to our years-long experience we are in a position to supply brushes for every kind of machines.

We can guarantee the long life of our brushes owing to the high density of the filaments and the high quality of the raw materials.

Depending on the wheel shape, we can realize custom made brushes.
